Sir or Madam:

In addition to the Examiner's statement of reasons for allowance, it is respectfully pointed out that the cited prior art, US Published Patent Application 2003/0035543 of Gillon et al, fails to teach or suggest determining whether to substitute a substitute frame g for the frame f based, at least in part, on a distance between frame g and frame f, and based, at least in part, on the identified key period associated with frame g and the identified key period associated with frame f, as explained on page 10 of Applicants' response of 5 July 2005.
